

TECHNICAL PACKAGING FOR MISSION-CRITICAL EQUIPMENT

BUILDING YOUR BEST-CASE SCENARIO

COMPANY DESCRIPTION

Packaging Strategies Incorporated designs and manufactures technical packaging solutions for government agencies, defense contractors, and every branch of the U.S. Armed Forces. Based in Baltimore, Maryland, we serve customers nationwide and have been protecting mission-critical equipment since 1990 as an ISO 9001:2015 certified, Made-in-USA manufacturer.

We understand the technical requirements, compliance standards, and procurement processes of government contracting. Our engineering team works directly from your specifications to deliver compliant, cost-effective solutions with the documentation your program demands — and same-day quotes so your procurement process keeps moving.

CAPABILITIES

- Custom rotationally molded, injection molded, and metal cases designed to MIL-STD specifications
- Systems integration: rack mount, electronics integration, and fully configured case solutions
- Custom foam cushioning systems designed using 3D modeling and CNC fabrication
- In-house shock and environmental testing
- First article sampling and engineering drawings included
- Product fulfillment services
- Full documentation and traceability in compliance with ISO 9001:2015

DIFFERENTIATORS

- ISO 9001:2015 certified and registered quality management system
